

PATENT ATTORNEY
Newly Qualified or Part Qualified
Leeds Based

Urquhart-Dykes & Lord LLP are seeking a patent attorney with expertise in mechanical engineering to join our Leeds team. Some experience in other technical fields, for example electronics or physics, would be advantageous but is not essential.

You will be either newly qualified or well on your way to completing your final exams, with an appetite to learn and take on your own portfolio.

Whilst there is an existing caseload for the successful candidate, a desire to acquire, foster and grow new clients and contacts is a key aspect of the role. Therefore, you will need to demonstrate effective communication skills and the drive to grow the practice.

You must have a minimum of a 2:1 degree in a relevant subject, for example physics or mechanical engineering. You will need to be able to interact with clients confidently and clearly, and understand and interpret new and complex technical concepts quickly.

Enthusiasm, attention to detail, and a willingness to take on responsibility at an early stage are essential attributes, as are excellent written and verbal communication skills and an ability to work well within a team.

The position offers excellent career prospects. UDL has an open and transparent career structure that we would be pleased to explore with you at interview. The position carries an attractive salary, private healthcare, life assurance and pension scheme.

Please quote reference **LE-PA01** on your application.

If you are interested, please send your CV and covering letter, in confidence, to:
